

**Cheboygan County Road Commission**  
**Wilmot Township Local Road Ratings Report for 2020**

The goal of the Road Commission is to use Asset Management Strategies when planning projects for the roads under the jurisdiction of the Cheboygan County Road Commission. Asset management, as defined by Public Act 199 of 2007, is an “ongoing process of maintaining, upgrading and operating physical assets cost-effectively, based on a continuous physical inventory and condition assessment. Using asset management will allow the Road Commission and Township to invest the available road funds in a manner that will provide the greatest return.

**Township Roads by Legal System**

**Red = State Highways – Blue = County Primary Roads – Orange = County Local Roads**

**Roads by Surface Type**

**Black = Pavement – Brown = Gravel – Green = Seasonal**

## PASER Road Rating System

All the local paved roads are rated each year using the PASER Road Rating system in the Township (seasonal roads are not included). PASER, or Pavement Surface Evaluation and Rating, is the rating system that is used in collecting data for RoadSoft. The roads are rated on a scale of 1 to 10 according to surface conditions of the pavement. The tables below show the rating and the suggested maintenance that would be required to preserve the road along with an estimated cost of repair.

### PASER Rating and Treatments for Paved Roads

Road Rating	Recommended Repair	Estimated Cost per Mile
10	No maintenance necessary. New Road	\$ 0
9	No Maintenance necessary. Smooth Surface.	\$ 0
8	Minor Crack Sealing	\$ 600
7	General Crack Sealing and/or Minor Patching	\$ 3,200
6	Patching and Sealcoat	\$ 29,000
	Ultra-thin Asphalt Overlay	\$ 63,000
5	Asphalt Wedging	\$ 47,000
	Asphalt Wedging and Sealcoat	\$ 75,000
	Asphalt Wedging and Ultra-thin Asphalt Overlay	\$ 106,000
4	Asphalt Wedging and Overlay	\$ 142,000
3	Pulverize, gravel and pave	\$ 240,000
2	Reconstruction.	\$ 350,000
1	Reconstruction. Failed Road.	\$ 350,000

Gravel roads are rated using the Inventory-Based Rating System™ for Gravel Roads (IBR). The IBR system considers three characteristics of a road segment to determine a rating for the segment. Surface width, drainage adequacy and structural adequacy are all evaluated to determine the segment rating. From this evaluation a rating of 1 to 10 is calculated.

### IBR Rating and Treatments for Gravel Roads

Road Rating	Existing Condition / Recommended Repair	Estimated Cost per Mile
10	No maintenance necessary. New Road	\$ 0
8 – 9	Good crown and drainage throughout. Adequate gravel for traffic. Maintain with grading and dust control.	\$ 500
6 - 7	Existing crown with drainage on 50% or more of roadway. Additional gravel needed in some areas along with ditching.	\$ 55,000
3 - 5	Little or no crown. Ditched on less than 50% of the road. Additional gravel needed on entire road along with ditching.	\$ 95,000
1 - 2	Failed road. Reconstruction.	\$ 250,000

## Wilmot Township Paved Local Road Ratings

### Current Road Ratings

PASER Rating	Road Name	Limits	Length (miles)
10			
9	Allen Creek Road Old Sturgeon Road Shire Road	Straits Highway to Old Sturgeon Road. McEachron Road to Bridge (WB Sturgeon River). Starting 0.10 miles south of Straits Hwy then 0.29 miles. End of 2017 project to end of 2018 project.	0.24 0.33 0.29 0.25
8			
7			
6			
5			
4	Shire Road	Straits Highway then south to end of pavement. Straits Highway to Wolverine Road.	0.10 0.84
3	Silver Lake Road	Peters Road to Seng Road.	0.36
2	Silver Lake Road	Seng Road to Wolverine Road.	0.22
1			

## 2016 - 2019 PASER Ratings for Paved Local Roads

## Average PASER Rating for Paved Local Roads

## Wilmot Township Gravel Local Road Ratings

### Current Road Ratings

PASER Rating	Road Name	Limits	Length (miles)
10	Peters Road	DNR Park Road to Wolverine Road.	0.75
9	South Shire Road	Otsego Road to Gaylord Road. Wolverine Road to Township Line.	0.24 1.00
8	Henry Collins Road Otsego Road	Wolverine Road to Mentor Road. Ashley Road to Straits Highway.	0.50 0.51
7	Henry Collins Road	Mentor Road then south to end of road.	0.30
6	Allen Creek Road Ashley Road Bilder Road Bilder Cutoff Road Dunham Road Friendly Drive Fulmer Road Old Sturgeon Road Perry Road Peters Road  South Shire Road Silver Lake Road South Shire Road	Straits Highway to Seasonal Road. Straits Highway to Seasonal Road. Wolverine Road to Township Line. Wolverine Road to Bilder Road. Ashley Road to Sunshine Trail. Silver Lake Road to end. Straits Highway to Seasonal Road. Fulmer Road to Bridge (WB Sturgeon River) Perry Road to McEachron Road. Old Sturgeon Road to Straits Highway. Fulmer Road to DNR Park Road. Gaylord Road then east to seasonal road. Peters Road then west to Seasonal road. Dunham Road to Straits Highway.	0.27 0.34 0.67 0.15 1.50 0.87 1.11 0.10 0.90 0.25 1.15 0.50 0.25 0.50
5	Gaylord Road Otsego Road Peet Road Sunshine Trail	South Shire Road then north to seasonal road. Ashley Road to Straits Highway. Peters Road then west to Seasonal Road. Straits Highway to Seasonal Road.	0.10 0.72 0.51 0.37
4	South Shire Road	Pitoniak Road then north to pavement.	0.69
3	Seng Lane	Silver Lake Road to Wolverine Road.	0.21
2	DNR Park Road McEachron Road	Peters Road to the end. Old Sturgeon Road to Seasonal Road.	0.26 0.64
1	Fulmer Road Gaylord Road	Old Sturgeon Road to start of seasonal road. South Shire Road then south to seasonal road.	0.10 0.26

## 2018 - 2019 IBR Ratings for Gravel Local Roads

## Average IBR Rating for Gravel Local Roads

## Service Life of Treatments

Service life is the expected time that a treatment will last before needing complete reconstruction. In the table below, an expected service life for a particular treatment is listed. Before a treatment reaches the expected service life, preventative maintenance should be performed. Preventative maintenance will extend the expected service life of the pavement and treatment.

### Service Life of Treatments for Paved Roads

Road Rating	Recommended Repair	Expected Service Life (years)
8	Minor Crack Sealing	5
7	General Crack Sealing and/or Minor Patching	5
6	Patching and Sealcoat	7
	Ultra-thin Asphalt Overlay	7 – 10
5	Asphalt Wedging	7
	Asphalt Wedging and Sealcoat	7 – 10
	Asphalt Wedging and Ultra-thin Asphalt Overlay	10
4	Asphalt Wedging and Overlay	12 – 15
3	Pulverize, gravel and pave	15 – 25
2	Reconstruction.	25 - 30
1	Reconstruction. Failed Road.	25 - 30

For example, if a road has a PASER rating of 6, a treatment of a ultra-thin asphalt overlay is recommended (see the Table titled PASER Ratings and Treatment on page 1). The expected service life for an ultra-thin asphalt overlay is 7-10 years. Preventative maintenance in the form of crack sealing may be required after 2 years.

Expected service life may be shorter if the road is on poor soils that are not addressed as part of the treatment. If a project is selected that is not the recommended treatment, the service life listed in the table above will be shorter and preventative maintenance will need to be performed sooner.

Service Life for a gravel road is difficult to predict. Gravel road conditions can change rapidly based on weather, grading and traffic effects on the roads.
