2022 JETTER/VAC TRUCK RENTAL BID

The Cheboygan County Road Commission will accept sealed bids for **2022 Jetter/Vac Truck Rental**.

Bids shall be submitted on the enclosed Salt Barn Repairs Bid Sheet in a sealed envelope clearly identifying the bidder and marked "2022 Jetter/Vac Truck Bid".

Work shall be completed between May 4, 2022 and August 6, 2022, unless otherwise approved by Road Commission.

CCRC is tax exempt from all State and Federal Taxes.

Bids are due at **2:00 p.m., Tuesday, February 1, 2022**, at which time, the bid will be publicly opened and read aloud. Bid results will not be available until they have been tabulated and presented with recommendations and approved by the Road Commission Board at their next regular meeting on February 3, 2022.

Cheboygan County Road Commission reserves the right to accept or reject any and all bids, in whole or in part; to waive irregularities or informalities; and to award bids, in whole or in part, as deemed to be in the best interest of the Cheboygan County Road Commission.

Jetter/Vac Truck Specifications

Debris Body

- The body shall be cylindrical having a minimum usable liquid capacity of 15 cubic yards.
- (4) Dual vertical (cyclone) centrifugal separators shall be installed in-line between the debris body and the air mover, (2) per side for each debris body discharge port. Each dual separator shall include large fallout chamber cleanout door.

Vacuum

- Blower shall be driven by the chassis engine and shall produce inlet volume of 4500 cfm @ 0" hg @ 2250 rpm, and 3490 cfm @ 18" hg @ 2250 rpm vacuum (Roots 824RCS 18 or equal). Drive engine not to exceed 1760 RPM.
- Vacuum shall be provided by a positive displacement rotary lobe type blower driven via chassis engine and heavy duty split transfer case direct to the blower.
- Interlock safety system shall prevent drive axle from engaging.
- A cordless remote boom control system equipped to activate boom functions, throttle, water pump on/off, hose reel in/out, hose reel speed, vacuum relief on/off and emergency disengagement e-stop shall be provided.

Water

- High-pressure water (rodder) pump system shall be completely controlled through the range with use of the multi-flow control and throttle located on the control panel.
- The water pump shall provide precise 0-100 GPM controlled flow at variable pressure up to 2000 PSI.
- For most efficient use of horsepower and reduced fuel consumption, high pressure rodder pump shall be hydraulically driven via (2) variable displacement pumps
- Water tank must be a certified metered capacity of 1500 gallons.

Hose Reel

- The front mounted hose reel shall telescope 15" forward down centerline of truck.
- Entire reel assembly shall rotate 270 degrees on a large diameter ball bearing.
